

Luis Sebastian Ibarra Villamil

DevOps Engineer | AWS · Docker · Kubernetes · CI/CD · Terraform

📍 Neiva, Colombia • ✉ hello@luisibarra.dev • 📞 +57 312 3622460 • 🌐 luis-sebastian-ibarra • 🐙 sebastianiv21

Technical Skills

Infrastructure & Cloud: AWS, Docker, Kubernetes, Terraform, Linux

CI/CD & Automation: GitHub Actions, CI/CD pipelines

Observability: Grafana, Prometheus, Loki

Languages & Frameworks: Python, FastAPI, Node.js, Golang

Databases: PostgreSQL, MongoDB

Experience

Appsmith, Technical Support Engineer (DevOps Focus) – Remote Apr 2025 – present
Developer tooling — open-source low-code platform for building internal apps, deployed across AWS, GCP, and Azure environments by teams worldwide.

- Troubleshoot production incidents in distributed, containerized (Docker/Kubernetes) environments — diagnosing failures across application and cloud infrastructure layers (AWS, GCP, Azure) for a global developer community.
- Implement third-party datasource integrations into the Appsmith platform, expanding available connectors and enabling customers to use external services directly within their workflows.
- Integrate a debugging SDK into the support workflow, enabling richer diagnostic data capture and reducing investigation time for complex customer issues.
- Build AI-powered log analysis tooling using LLM-based prompts to automate log investigation, improving operational visibility and troubleshooting efficiency for the team.
- Analyze logs and metrics using Grafana Cloud to identify root causes, performance bottlenecks, and system instability in production environments.
- Contribute to internal runbooks, incident documentation, and support articles — reducing recurrence of common issues across a distributed, cross-timezone team.

Professional Industrial Services SAS, Full Stack Developer – Remote Mar 2023 – Mar 2025
Logistics tech — vehicle tracking and fleet management platform serving 1,000+ users and vehicles across Colombia and Dominican Republic.

- Design and deploy Golang and Python-based backend services and APIs for the vehicle logistics platform, handling real-time tracking and fleet operations at scale.
- Migrated existing backend services to Docker containers, improving deployment consistency, fault tolerance, and environment parity across dev and production.
- Migrated manual deployment processes to automated CI/CD pipelines using GitHub Actions, eliminating manual errors and improving release velocity.
- Operate and optimize PostgreSQL databases across multiple environments, ensuring data integrity, performance, and availability.
- Investigate and resolve production issues across application and infrastructure layers, minimizing downtime and improving system stability.

Scotiabank, Technical Support Analyst – Remote July 2023 – Jan 2025
Fintech / banking — technology arm of Scotiabank, one of Canada's largest financial institutions, operating across 55+ countries in a regulated environment.

- Maintain 200+ mission-critical banking applications across 55+ countries and 3,000+ branches, ensuring service delivery and system stability at enterprise scale.
- Diagnose and resolve database and infrastructure issues, minimizing downtime and maintaining uninterrupted service across a globally distributed environment.
- Manage support requests through ServiceNow, documenting solutions to build a reusable knowledge base and reduce recurrence of common issues.

Projects

LogPilot

2025 – present

Personal Project

- Build a local-first observability platform: upload compressed log archives, parse and store in Loki, derive metrics for Prometheus, provision Grafana dashboards, and use an AI agent to produce structured incident reports.
- Full stack runs via Docker Compose; reports are exportable as Markdown or PDF.
- Stack: Docker · Loki · Prometheus · Grafana · PostgreSQL + pgvector · Python

Education

B.S. **Universidad Surcolombiana**, B.S. in Electronic Engineering 2015 – 2021

Technologist **SENA**, Technologist in Analysis and Development of Information Systems 2020 – 2023

Certifications

AWS Certified Solutions Architect – Associate May 2026
Amazon Web Services

Bootcamp DevOps Apr 2026
CloudCamp

DevOps and Software Engineering Specialization Jan 2024
IBM / Coursera

Application Security for Developers and DevOps Professionals Jan 2024
IBM / Coursera

Languages

Spanish: Native

English: C1

Portuguese: B1
